RESEARCH INTEREST

I am broadly interested in computer networks and distributed systems. My current work focuses on network measurement and edge network design.

EDUCATION

Ph.D. Candidate, Computer Science Sep 2019 - *Present*
Northwestern University, Evanston, IL
Advisor: *Prof. Aleksandar Kuzmanovic*

B.Eng., Computer Science Sep 2015 - Jun 2019
Beijing University of Posts and Telecommunications, Beijing, China
GPA: 3.7/4.0 (87/100), Graduated With Honors

RESEARCH AND WORK EXPERIENCE

Northwestern University, USA Sep 2019 - *Present*
Research Assistant, Advisor: *Prof. Aleksandar Kuzmanovic*

- *Snatch: Streaming Analytics at the Network Edge*
 - Proposed and developed Snatch, a system that accelerates online streaming analytics by breaking the current arrangement and leveraging semantic cookies and in-network computation
- *Monetizing Spare Bandwidth: the Case of Distributed VPNs*
 - Performed the first systematic measurement study of the decentralized VPNs ecosystem focusing on the major players shedding lights on the performance, privacy and security issues
 - Developed a convenient DVPN manager system (RING) which provides security and privacy guarantees, as well as automatic bandwidth and price control which optimize the income of DVPN node providers
- *Decoding the Kodi Ecosystem*
 - Worked on De-Kodi, a system capable of crawling large cross-sections of Kodi's decentralized ecosystem
 - Developed SafeKodi system which leverages the help of Kodi users to explore the Kodi ecosystem in the wild and, in return, offers information about potentially malicious add-ons to Kodi users.
 - SafeKodi has received multiple media coverage and is used by over 20k distinct users
